FOR VESPA LARGE FRAME 80, 125, 150, 200.

■ SKU:
P400480700062

■ PRICE:
€ 35,00 (VAT excl.)

#ATHENARESTARTSVESPA

This **complete and unified gasket kit** for **Large Frame Vespa** was developed for all Vespa enthusiasts who want to rebuild the engine of their bikes with **safe and cutting-edge products**.

With over 40 years of experience in the production of gaskets for high-performance racing engines, Athena has engineered this unique gasket kit, specific for **Vespa Large Frame**, which ensures several advantages:

MAIN FEATURES

BYE BYE SILICONE

Unlike classic asbestos-free gaskets on the market, **this Athena gasket kit do not require extra sealants to guarantee a perfect seal.**

Simply remove the old gaskets and install the new Athena kit: you will not have to clean silicone residues from the crankcase anymore nor wait hours after applying a sealant.

UNIQUE ON THE MARKET

The aluminum core of the gasket ensures **excellent resistance to engine pressure and thermal expansion**, while the external rubber coating **adheres perfectly to the engine surfaces**, and it seals common porosity or defects of overhauled engines.

Classic asbestos-free gaskets can not boast these sealing and resistance characteristics.

UNIFIED GASKET KIT: +70 APPLICATIONS

The composition of this kit unifies the most popular and beloved Vespa Largeframe applications, such as PX80, 125, 150, 200 / Rally 200 / 2 intake ports models 125, 150.

Choose the gaskets that best suits your needs, and carefully use a cutter to remove any extra parts of the crankcase gasket.

Discover the complete list of applications on athena.eu.
